# POST-PRESETS 128+
COLORS GRADIENTS COLLECTION

This a set of more than 128 color gradients for post processing
Color gradients for color correction are widely distributed in computer graphics, and the algorithms for working with them are very fast, so you can use them even on mobile devices

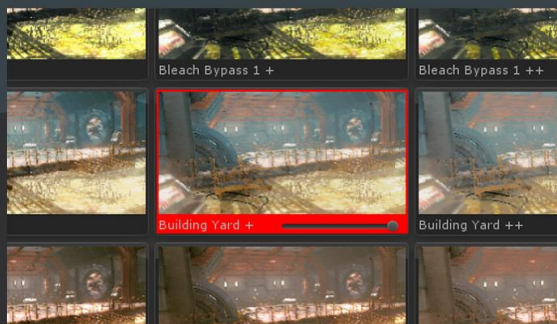

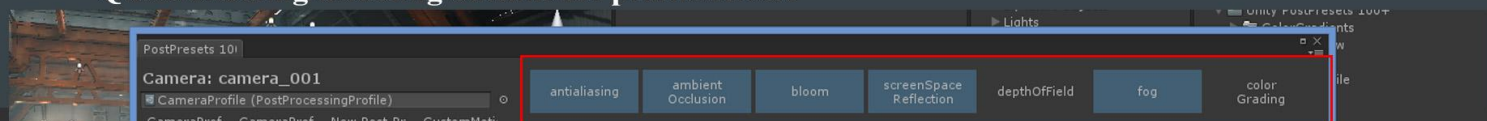

plug-in includes:

- **default unity postprocessing script (optional)**

- **a folder with gradients**
- **convenient editor window (optional)**
- **a folder with example scene (optional)**

- **Camera : current scene camera**
- **CameraProjile : current camera profile**
- **Buttons of Last selected profiles**
- **Buttons of operations with current profile**
- **Will the images of the presets be automatically redrawn if the profile has been changed**

Quick enabling/disabling buttons for profile effects

You may quickly adjust the blending of the preset using the slider next to image
